It's sustainability : Rapidly renewable, biodegradable, recyclable, and can be produced organically.

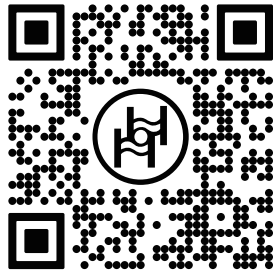

TENCEL™ is brand name of LENZING™ Cellulose and Modal fiber. It helps to maintain the environmental balance by being integrated into nature's cycle.

Bemberg is made from the smart-tech transformation of cotton linter bioutility waste. Biodegradable and compostable fibers and then decomposed naturally.

FSC identifies responsible viscose, complying with environmental, social and economic standards by forest stewardship council.
